📍 Lahore, Pakistan

SUMMARY

I am Hafiz Abdullah, a dedicated Software Engineer with over 5 years of experience in building full-stack applications. My expertise in the MERN stack and various backend technologies allows me to design scalable solutions effectively. I thrive on challenging projects that require technical acumen and a problem-solving mindset, seeking to contribute my skills to a progressive team

EXPERIENCE

Associate Lead

Walee

📅 01/2025 - Present 📍 Lahore, Pakistan

- Leading frontend and backend development of scalable web features using Next.js and Node.js
- Designing and maintaining RESTful APIs and services with NestJS and MongoDB
- Collaborating with cross-functional teams to deliver product requirements on time
- Mentoring junior developers and reviewing pull requests to uphold code quality

Senior Software Engineer

Devfied

📅 09/2024 - 06/2026 📍 Lahore, Pakistan

- Built full-stack features for a healthcare platform (Opto Health) — patient triage flow, doctor assignment engine, and dynamic intake forms using React.js and Node.js
- Developed a cross-exchange copy trading platform enabling users to replicate trades across Binance and Bybit with real-time analytics and performance tracking
- Designed MongoDB schemas and REST APIs to support both platforms, optimizing queries for performance and scalability
- Delivered reusable React components and collaborated with product teams to ship features on schedule

Software Engineer

Mergestack

📅 01/2023 - 09/2024 📍 Lahore, Pakistan

- Promoted to Software Engineer
- Worked on M1neral — a transaction management platform for minerals and royalties from associate level through to a full software engineer promotion
- Built spatial search and map-based discovery features using React.js, enabling buyers, sellers, and service providers to find and evaluate mineral opportunities
- Developed backend services with Node.js and MongoDB to manage complex transaction data, document workflows, and multi-party collaboration
- Integrated Elasticsearch to power fast, location-aware search across large mineral and royalty datasets

STRENGTHS

Technical Proficiency

Proficient in full-stack development with expertise in modern frameworks and technologies

Problem Solving

Strong problem-solving skills with a knack for delivering innovative solutions

KEY ACHIEVEMENTS

Cross-Exchange Copy Trading Platform

Developed a unique cross-exchange copy trading platform that allows users to replicate strategies across multiple trading platforms seamlessly

Opto Health

Contributed to the development of the Opto Health platform, enhancing patient care through automation and effective resource allocation

QuickTopups

Led a team in developing QuickTopups.com, a digital recharge platform that integrates various services for user convenience

SKILLS

Gmail	GitHub	GraphQL	REST
Web3.js	JavaScript	Next.js	
Node.js	NestJS	MongoDB	
React	Elasticsearch	React Native	
AWS			

EXPERIENCE

Associate Software Engineer

Mergestack

📅 01/2022 - 01/2023 📍 Lahore, Pakistan

N/A

- Worked on M1neral — a transaction management platform for minerals and royalties from associate level through to a full software engineer promotion
- Built spatial search and map-based discovery features using React.js
- Developed backend services with Node.js and MongoDB

EDUCATION

BSc in Software Engineering

Faculty of Computing & Information Technology
(FCIT/PUCIT)

📅 10/2018 - 12/2022 📍 Lahore, Pakistan
